121022WWP

GENERAL WASTEWATER PUMP

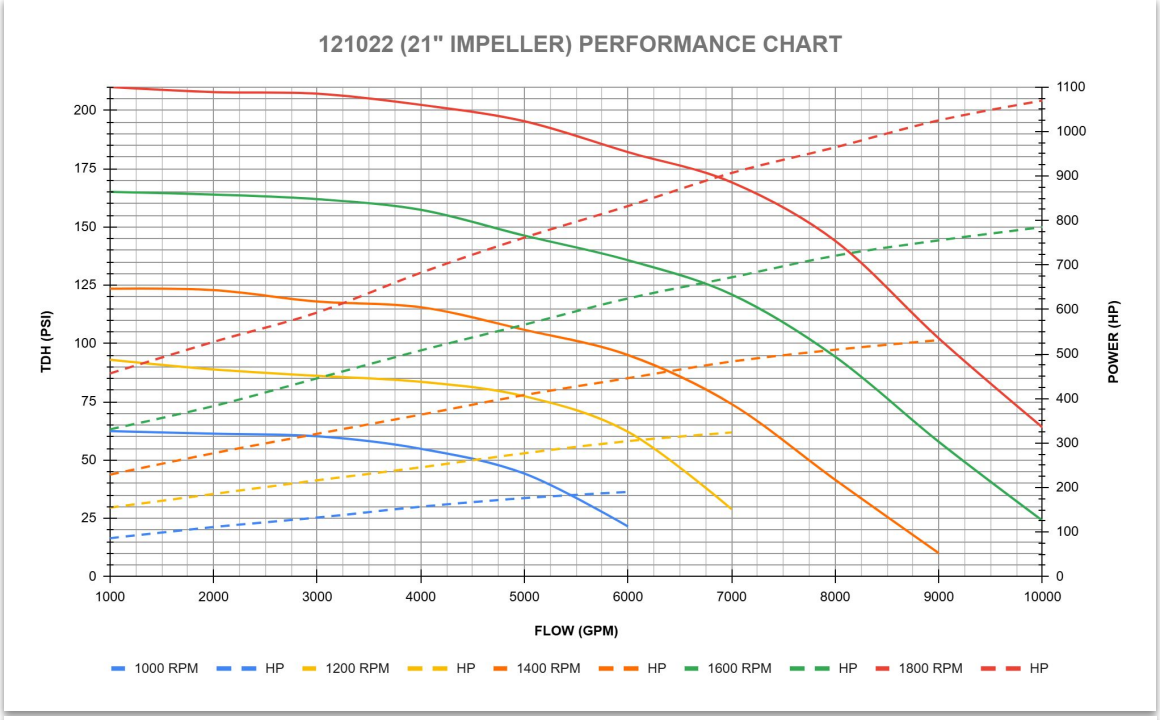

- Completely corrosion free in saltwater applications
- Flows up to 10000 GPM
- TdH up to 200 PSI
- Five vane, closed impeller design
- Up to 2.25” solid pass-through
- Stainless Steel Shaft
- Stainless Steel Mechanical Seal w/ run-dry lubrication system
- 12” Suction (optional 14”) / 10” Discharge (optional 8”)
- Standard SAE 1 Bell Mount
- 550 lb Pump Assembly (excluding primer)
- Optional belt-driven pressure clutched vane vacuum priming system

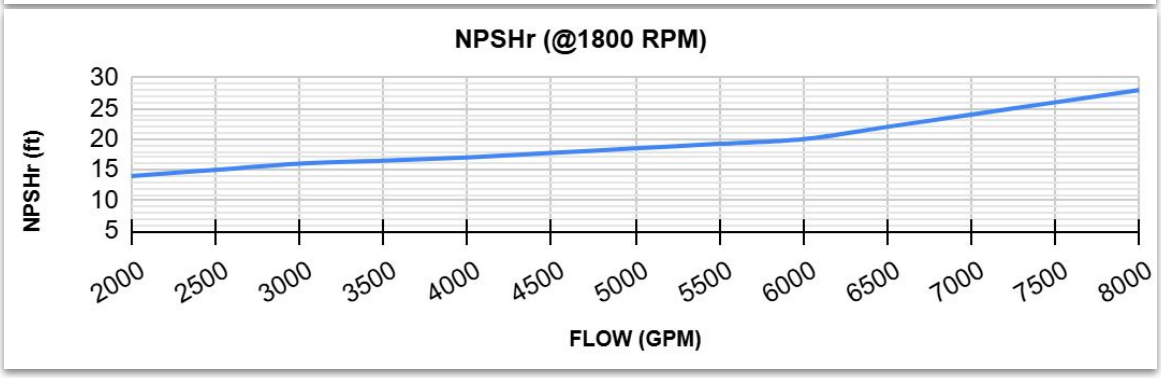

The 121022WWP is a lightweight composite wastewater pump designed for general wastewater transfer up to 10000 GPM. Its state-of-the-art carbon-fiber body and impeller are corrosion-proof in saltwater, and caustic and acidic solutions while additionally being 80% lighter than any competing metal pump on the market. The pump comes standard with a 17-4 PH Stainless Steel shaft and self-adjusting stainless steel mechanical seal. The double-volute design provides a radially balanced, high reliability, low-maintenance system, optimal for dewatering operations.

A fully American innovation, the pump is manufactured in Pennsylvania, USA. All KASE Pumping Systems pumps come with a **lifetime corrosion warranty** on casings and impellers when used in saltwater service. The pump assembly is provided with a standard 1-year/2000 hour operational warranty.
